Ch. 1.3: Velocity, time and distance Name $\qquad$

Directions: Use the equation $v_{\text {average }}=\frac{\Delta d}{\Delta t}$ to answer the following questions. Show your work and include the units.

1. A football field is about 100 m long. If it takes Jenny 20 seconds to run its length, what was her speed?
2. The pitcher's mound in baseball is 85 m from the plate. It takes 4 seconds for a pitch to reach the plate. What the velocity of the pitch?
3. If you drive at $100 \mathrm{~km} / \mathrm{hr}$ for 6 hours, how far will you go?
4. Every summer Joe drives to Michigan. It is 2000 km to get there. If he averages $100 \mathrm{~km} / \mathrm{hr}$, how much time will he spend driving?
5. A bullet travels at $850 \mathrm{~m} / \mathrm{s}$. How long will it take a bullet to go 1 km ?
6. The fastest train in the world moves at $500 \mathrm{~km} / \mathrm{hr}$. How far will it go in 3 hours?
7. How long will it take light moving at $300,000 \mathrm{~km} / \mathrm{s}$ to reach us from the sun? The sun is $15,000,000 \mathrm{~km}$ from earth.
8. It is 21,000 kilometers around the earth and the earth rotates in 24 hrs. How fast is it rotating?

Part II Graphing
Directions: Using the data in the following table, construct a graph of distance vs. time. Then answer the questions about that graph.

| Distance $(\mathrm{m})$ | Time $(\mathrm{sec})$ |
| :--- | :--- |
| 10 | 20 |
| 20 | 40 |
| 35 | 70 |
| 65 | 130 |
| 85 | 170 |
| 100 | 200 |

9. Does this graph represent constant or changing speed? How do you know?
10. Find the slope of the line and find the average speed.

Directions: Using the data in the following table, construct a graph of distance vs. time. Then answer the questions about that graph.

| Distance $(\mathrm{m})$ | Time (sec) |
| :--- | :--- |
| 15 | 20 |
| 25 | 50 |
| 40 | 65 |
| 70 | 130 |
| 90 | 185 |
| 100 | 200 |

11.Does this graph represent constant or changing speed? How do you know?
12. Which section of the graph represents the highest speed
